## IT SKILLS

- Angular
- html, css, javascript
- C#
- Typescript
- Python
- Avalonia

## Languages

- Polish - Modersmål
- English - Flydende
- Danish - Kendskab

## INTERESTS

- Web development
- UI/Ux design
- Climbing

## Skills

- Problem-Solving Skills
- Leadership
- Creativity
- Responsibility and communication
- Goal-Oriented Focus
- Persistence

## PROFILE

I am a second-year software engineering student at the University of Southern Denmark. I completed high school through home study, which instilled in me strong discipline and self-motivation. Creative and proactive, I enjoy taking the initiative and work well with others.

In my free time, I love coding, reading books, and climbing, and I also volunteer at a local climbing club. Eager to learn and grow, I am excited about the opportunity to work with a company that supports personal and professional development

## EXPERIENCE

### ○ Front-end Lead developer

SyncLink Startup 10/2024 - 01/2025

Web development agency – Team lead. Led developers and collaborated to build responsive, user-focused web applications.

- Oversaw task distribution and ensured efficient workflow.
- Responsible for Git version control
- Provided support and guidance to other developers.

### ○ Engineer

Part of university course 09/2024 - 01/2025

My team and I collaborated with linak to develop a healthy desk application that promotes better posture and movement habits. Using real-time data and intuitive controls, the app encourages users to adjust their desk height regularly, supporting overall well-being and productivity.

- Responsible for developing frontend in angular.
- Responsible for Api frontend connection

### ○ Engineer

Part of university course 02/2024 - 06/2024

My team and I collaborated with Danfoss to develop a user-friendly heating grid optimization app using Avalonia, enhancing system efficiency with real-time data and control.

- Responsible for UI/UX design
- Responsible for Data visualization
- Developer of heat optimization algorithm
